- Step 1:** Slide track sections (12 pieces) together to form a circle.
- Step 2:** Install track clips (#1150) to the underside of track ties to keep tracks together.
- Step 3:** Place locomotive and cars together on the track with coupling hooks to the rear.
- Step 4:** Place track connection wires (red and blue with connectors on one of their ends) under the ties and connect to the brass rails. Finger tighten thumb screw onto the sides of the rails.
- Step 5:** Hook up track connectors (red and blue wires) to the transformer by inserting these wires into post #1 and #2. Depress spring loaded posts to insert wires, spring action will hold the wires in place.
- Step 6:** Plug transformer into any 110 Volt AC wall outlet. Turn the control knob on transformer to the right or to the left to vary forward or reverse speed.
